

**Name of the Faculty Member:** Dr. Himani Sharma

**Name of Activity:** Book Review

**Name of Course/PAPER:** Management Process and Organisational Behaviour

**Semester:** I

**Brief Description:** Book review is very important for management students to know diverse topics of management and as class activity it leads to rich and healthy discussion and broaden students' point of view. Each student was told to select a book written by management gurus/professionals which should cover any topic of the said course and then they need to prepare a summary in 1000 words and then present in the class followed by discussion. This activity helped students to get information concerning the contribution a book makes in terms of new knowledge or perspectives to its intended field. This activity also helped students in polishing their learning and communication skills.
