 - Chairman, Board of Governors, IIM, Jammu
 - Live link: <https://fb.watch/3ifkI8sCqa/>
 - Co-ordinator: Ms Gargi Boora, Assistant Professor

➤ **Lecture Series and Panel Discussion**

➤ **Lecture Series: Five Lecture in the Series:**

➤ **Lecture 1 on “Pandemic COVID-19 and Indian Economy”**

○ **Speaker: Ms Bidisha Ganguly, Chief Economist, CII, June 12, 2021**

○ **Live link: <https://fb.watch/6hhTLJaQGh/>**

○ India’s growth for FY 22 is pegged at 12.5% and for FY 23 is pegged at 6.9%. India is the only country expected to register a double digit growth this fiscal. However fresh waves of pandemic in multiple regions including India poses significant challenges to global recovery. 5 sectors registered a double digit growth in Q3’FY21. These are metals and mining, automobile, textile, consumer durables and capital goods. Sectors impacted by first wave like tourism, hospitality, education and retail are under tremendous stress. The ongoing second wave has impacted supply chains in the economy. The recovery in consumption demand will likely be much weaker compared to previous year as health-related exigencies and job losses has squeezed disposable incomes. However, the economic impact may remain localized, faster vaccination July’21 onwards, strong global growth, and easy financial conditions are likely tailwinds for the ongoing business cycle recovery.

➤ **Lecture 2 on “Pandemic COVID-19 and Indian Economy”**

○ **Speaker: Dr SP Sharma, Chief Economist, PHDCCI, June 13, 2021**

○ **Live link: <https://fb.watch/6hhWNs8BNT/>**

○ We have to provide and facilitate the growing segments in the right policy environments. We have to move forward with great zeal and confidence first with vaccination, second with health infrastructure, third with direct benefits and to have more export opportunities in global market. We need to find out the promising sectors like textile, services and infrastructure in order to provide more and more job opportunities.

➤ **Lecture 3 on “Pandemic COVID-19 AND Indian Economy”**

○ **Speaker: Mr Anshuman Tiwari, Editor, India Today, India Today Group, New Delhi, June 15, 2021**

○ **Live link: <https://fb.watch/6hhYkn61XA/>**

○ The time we entered into COVID 19, India was at lowest rate of growth of Last 6 to 7 years which was less than 5%. Comparing to countries like USA, UK , China, these countries showed a sign of recovery from 2018 19 onwards. So they have got a shock to the economy from the CCOVID 19 related hit when there economic base was strong but we were already suffering from an infection of slowdown and due to which India suffered a lot from this pandemic.

○

➤ **Lecture 4 on “Pandemic COVID-19 and Indian Economy”**

- **Speaker: Mr Jagmohan Sood, COO, Jindal Stainless Steel Ltd., Hisar , June 17, 2021**
- **Live link: <https://fb.watch/6hibKMPXIQ/>**
- He emphasized importance of initiatives like domestic production and liquidity. Government should take majors to control the inflation so that consumers can create demand for the goods and the industries can revive their economy of scale.

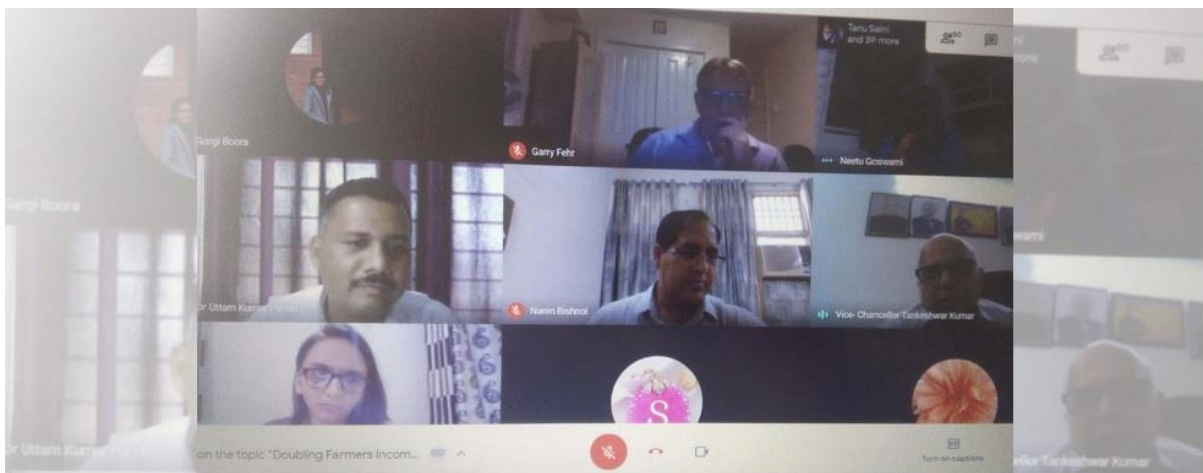

➤ **Panel Discussion**

- **Topic: Pandemic COVID -19: Impact and Coping Strategies of Industries, June 18, 2021**
- **Live link: <https://fb.watch/6hjpCwO8aU/>**
- **Speaker 1: Mr Kumaran Sasikanthan, VP, Product Development, Informatica**
- He pointed out the opportunity created by this pandemic, especially in education and IT industries. His suggestions include skilling up employees , providing them technical training, shifting industries into logistic work, so that any such circumstances could not hit economy drastically.
- **Speaker 2: Karan Tayal, Director, Hisar Metal Industries Ltd.**
- In spite of the challenges faced by different sectors due to risk and uncertainty, pharma and automotive sector has performed quite well. It may be due to technical advancements there. He thus stated that for survival it is important to cope up with the new IT flow and there is utmost need to uplift skills. It is important to enhance the infrastructure development to tackle some major challenges.
- **Speaker 3: Sidharth Bhargava, Serial Entrepreneur**
- In context of education and entertainment industries, the impact was on supply side rather than on demand side due to imposition of lockdown in the 1st wave. In the second wave, things got quite easier for these sectors because they switched themselves to online services, thus the challenges got converted to opportunities for higher productivity. Similarly, other sectors can perform well if they are able to manage things against challenges.
- **Speaker 4: Durga Dass Goyal, Regional Head MSME Loans, ICICI Bank Ltd.**
- The pandemic gave a hard hit to MSMEs. However, the government provided support to them via some major policies and broadening the coverage of MSMEs. According to him, MSMEs faced challenges due to lack of planning either in terms of management, strategy or structure, thus to overcome the challenges, they require more analytical thinking and proper planning to scale up their industries.

- **Speaker 5: Harbhajan Singh, CII Chairman- Ease of Doing Business, Haryana**
- 1st wave was more challenging than 2nd one in terms of production. However, there are more life concerns this time. A lot have changed since the pandemic hit, the trend changed from luxurious spending to expenditure on necessary goods. It will be beneficial for us to move forward with new trends and change consumption behaviour to motivate the economy.

➤ **Lecture 5 “Pandemic COVID-19 and Indian Economy”**

- **Speaker: Ms Jyoti Vij, Deputy Secretary General, FICCI**
- **Date: June 20, 2021**
- **Live link: <https://fb.watch/6hl50uFenT/>**
- 2nd wave hit us harder in terms of infections and deaths. It was due to ill preparation of health infrastructure that resulted in a lot of losses of life. However, this has made people more health conscious. Apart from financial and health services, it is the need of the hour to encourage consumers to demand which would contribute to the growth of the economy. Steps should be taken to develop health infrastructure; transportation development and more job opportunities should be created for household sector. There is also a need to support unauthorized sectors.

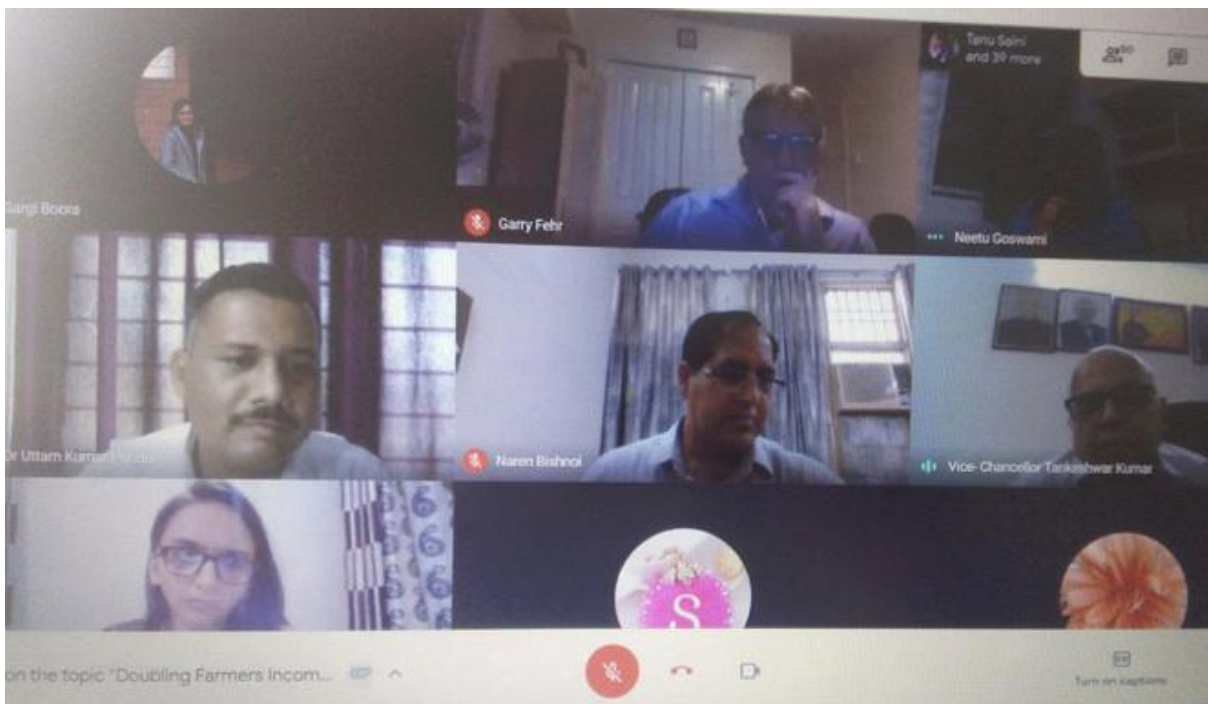

Hisar: The Department of Economics, Guru Jambheshwar University of Science and Technology, Hisar, organised a webinar on the topic “Doubling farmers’ income in India: Learning from Canadian experience”. VC Prof Tankeshwar Kumar was the chief guest of the webinar. Prof NK Bishnoi, dean, faculty of Humanities and Social Sciences and Chairperson of the department presided over the programme. Dr Garry Fehr, Associate Vice President, Research, Engagement and Graduate Studies, University of the Fraser Valley, British Columbia, Canada, was the key note speaker of the webinar. Dr Uttam Panda, Assistant Professor (Sociology), Hidayatullah National Law University, Raipur, and Dr Nitu Goswami, Research Associate, University of the Fraser Valley, British Columbia, Canada, were present as subject experts at the webinar.
